

2. color

permanent palette

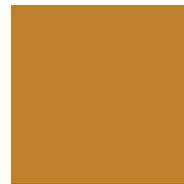

The permanent palette refers to colors that can not be changed in the system. They are either natural material colors, or are established for viewing requirements and can not be compromised without degrading legibility.

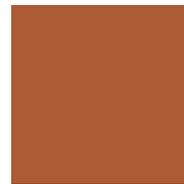

highway directional background

pole color

brass

copper

steel

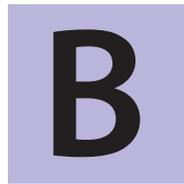

bronze

sign palette

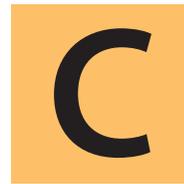

The sign palette is used in the family of wayfinding elements that compromise the system.

destinations

parking

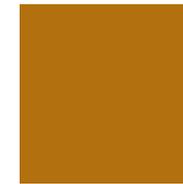

recreation

first aid/services

post hardware

post hardware

icon palette

A series of key colors is selected to provide more target value to the icons on top of the columns.
