

Determining Renton Residency

Unduplicated City clients served is a required performance measure. Not all Renton addresses are in the Renton city limits, but determining who is a City resident or non-City resident is important, as Renton grant funds cover only City residents. Renton's boundaries are not the same as Renton School District. There are several ways to determine if a person is in the Renton City limits for Human Services contracting purposes:

1. If the address meets any one of the following criteria, they are in Renton.
 - All addresses in the 98055 and 98057 zip codes
 - 1 and 2 digit street addresses with a Renton mailing address
 - Named avenues and a Renton mailing address
 - Addresses with 4 digits or less (up to 6700) and a Renton mailing address
2. [RentonAddressLocator](#)
Click search address and enter the address. You don't need to use the city. Addresses that match will appear on the left. Hover your mouse over the correct address and a red dot will appear on the map. City limits are shown in red. If the dot is close to the city boundary, you can use the plus/minus ruler on the left hand side of the map to enlarge the area.
Note: If Silverlight is not available on your machine, it will ask you to install it.
3. King County Parcel View:
<http://gismaps.kingcounty.gov/parcelviewer2>

Note: King County system only allows one address per lot, but there can be multiple addresses on the lot, so you may not find the specific address you're looking for. It should give you an idea of the location and if it is in the city limits.
